

## Integrated Quality and Environmental Policy

### Our Commitment to Quality and Environmental

At TriEye, our steadfast dedication lies in delivering products and services that consistently surpass customer expectations. Our unwavering commitment to both quality and environmental stewardship forms the bedrock of our organizational ethos, permeating every facet of our operations.

### Key Principles:

- **Customer Focus:** We strive to understand our customers' needs and expectations, delivering products and services that meet or exceed their requirements. Customer satisfaction is our ultimate goal.
- **Compliance:** We adhere to all applicable legal, regulatory, and other requirements relating to quality and environmental protection, in accordance with ISO 9001:2015 and ISO 14001:2015 standards.
- **Continuous Improvement:** We are dedicated to continually improving our quality and environmental management systems. Regular reviews and performance evaluations are conducted to identify opportunities for innovation and improvement.
- **Resource Allocation:** We ensure the availability of necessary resources for managing the quality and environmental management systems, including training and developing human resources to enhance awareness and competence.
- **Environmental Protection and Pollution Prevention:** We are committed to minimizing, and where possible preventing, any environmental pollution arising from our activities. We aim to use resources efficiently, reduce waste, and continuously lower our environmental footprint.
- **Employee Involvement:** Our employees are the foundation of our success. We actively foster a culture centered on engagement, competence, and empowerment. By prioritizing ongoing training and development, we fortify our team's capabilities, ensuring their readiness to meaningfully contribute to our environmental and quality objectives.
- **Effective Communication:** We ensure that our policy and objectives are communicated, understood, and implemented at all levels of the organization. This policy is available to all employees, contractors, stakeholders, and the public.
- **Risk-Based Thinking:** We employ a proactive approach to identify, assess, and mitigate both quality and environmental risks throughout our processes, thereby enhancing our ability to achieve sustainable results and prevent undesired outcomes.

**Quality & Environmental Objectives:**

To fulfill our integrated quality policy, we establish and regularly review measurable quality and environment objectives. These objectives align with our commitment to customer satisfaction, continual improvement, and compliance with relevant standards.

**Responsibility:**

**Management Reviews:** The management conducts periodic reviews, at least annually, to evaluate the suitability, adequacy, and effectiveness of this policy. These reviews ensure the policy remains aligned with the company's strategic direction and environmental commitments, and is available to stakeholders and the public.

Every employee at TriEye is responsible for implementing and maintaining our quality and environmental management systems. Management provides leadership, resources, and support to ensure the effectiveness of this policy.

This policy is reviewed annually during management reviews to ensure its continuing suitability, adequacy, and effectiveness.
